

Welcome to The Science of Personal Mastery Course: Lesson 23

Tell me out loud how you are feeling now.

Thank you.

Tell me out loud any new thoughts or cognitions you have now, or anything else you want to share with me.

Thank you.

This Lesson is about making money. This Lesson (and the future Lessons focusing on money) are infused with "prosperity energy". Just holding this Lesson will cause your energy to change as it relates to money. Reading the Lesson will change it even more. And doing all the Money Processes could make you a "Money Magnet".

The subject of money in general, "making" money, and having money is an interesting and passionate topic for the majority of people. The subject of money in any form, triggers in individuals, varying, sometimes numerous, and sometimes intense, thoughts, feelings, and "hang ups or issues".

The vast majority of people say they want to have "more" money.

The vast majority of people also say that they do, in fact, "struggle" with their finances and "need" more money.

Tell me out loud your general thoughts and feelings about money (whatever comes to mind when you think of money, be as brief or as detailed as you want).

Thank you.

Karma is one major factor when it comes to whether you will be rich or poor in this lifetime.

Some people are born into a rich family. Others are born into a poor family. This is Karma.

Some people are born in rich countries such as Germany, Switzerland, Sweden, Norway, Japan, The UAE, or New Zealand where the standard of living is very high for most of the citizens. Some people are born in incredibly poor 3rd World Countries where the standard of living and quality of life is very low. This is karma.

Although it might appear otherwise initially, there is no such thing as good or bad karma, it is all just karma.

Everything you see and experience in life is a reflection of your inner state (vibration). Everything you see and experience is caused by your thoughts, postulates, decisions, intentions, words, desires and actions. When you take an action, it will come back to you in kind. What you sow, you reap. What goes around, comes around.

If you have a sense of duality such as me and you, my or mine and yours, this and that, here and there, us and them, then it appears there is good and bad karma. If you see all things as just a manifestation of the same energy, (or SELF, or awareness, or consciousness), and if you have a sense of oneness, then you just see everything as "perfect", and in harmony. You see everything as the perfect balance of ying and yang.

Karma is created by various factors including every time we: have a thought; make a decision; make a postulate; make a declaration or decree; have a desire; have a wanting or yearning; do NOT want something; say something with intent; have a wish; see a vision or a dream for the future; do something, take some action, put something in motion; feel an emotion.

When any of these things occur (and there are other ways karma is created), you send out a vibration or frequency into the ether. The Law of Attraction says that you will attract into your life the people, circumstances, conditions, situations, and events, that matches the frequencies you send out.

If something does not manifest while you are in your current incarnation, then it is held in your "vibrational escrow" to manifest at a later time in a later incarnation. This means when you come into this incarnation, you came into a body, and family, and place, and time, based on your vibrational escrow (karma). Your life is "set in motion" based on the vibrational escrow (karma) you have when you come into this life in this incarnation. You do have a certain "destiny". We all know this instinctively. If you search your feelings, you "know" this is Truth.

This is all karma. Everything in your vibrational escrow will manifest at some point, in some incarnation. When it does manifest, it can be challenging, or it can be wonderful, based on how you "deal with it" and how you perceive it. That is why there is no such thing as good or bad karma. Everything just is. YOU choose how you perceive it. YOU choose how you react or respond to it. YOU choose whether to make it "good" or "bad" or neutral.

The goal is not to eliminate karma. The goal is to be free from the "effects" karma has on your inner state.

One might say that if they were born into a rich family that they have good karma. But think of all the people born into rich families who become drug addicts and kill themselves.

One might say that being born into a poor family is bad karma. But think of all the successful, happy, healthy people, with wonderful loving families that were born into a poor family on the "wrong side of the tracks".

Karma gives us a starting point and a certain direction. All karma (unmanifested desires/vibrations/frequencies in your vibrational escrow) must manifest at some point in some incarnation.

You might have unmanifested desires (or postulates, decisions, vibrations, and actions that require a counter action and "return to sender" action and experience) in your vibrational escrow (karma) that you now, in this new unit of time, do not "want or desire" to have in your life. This can be handled.

Never think that there is "nothing I can do, I just have to deal with this karma and that is why I am poor, sick and miserable. It is not my fault and there is nothing that can change my situation, as it is just my terrible karma."

You can choose to be "cause" over your environment and your inner state, or you can be "effect". You can choose to be a ship without a rudder and sail, or you can choose to command your ship and take it anywhere you want to go, no matter which way the winds are blowing and no matter what the weather is.

No matter what your "karma", you CAN create the life you want, because even more powerful than karma is your current point of focus: your current vibration that you are broadcasting NOW.

All these unmanifested frequencies, even if now unwanted, must manifest. Do not let this worry you.

They can manifest in what you might call or classify as unpleasant, which in turn leads to suffering.

They can also manifest in what you might call challenging or learning experiences which in turn leads to growth.

They can also manifest in what you might call "blessings in disguise", from which the most wonderful miracles occur and from which actually cause all your dreams to come true.

The choice is yours now. You must understand that what is karmic, will manifest, but you choose NOW if they will manifest as disasters, learning and growing experiences or miracles that spring board you into manifesting all your dreams.

They can manifest quickly, and go quickly, like a tornado or earthquake. It is your choice.

They can also manifest slowly, and stay a long time, like a very slow moving hurricane. This is your choice as well.

Any "bad" karma can be like a fire in a forest (there is no good or bad karma, but you might still see or perceive some karma or it's effects as bad). These fires are nature's way of clearing away the old, and allowing for new growth. Forest fires can be a very good thing for the environment, and all of nature. Again, this is your choice.

All of these issues of karma will be addressed in detail in future Lessons. Now, know that doing what is suggested here will automatically start to "overcome" any "negative or bad" karma.

Simply confronting your karma, acknowledging your karma, and having a cognition about that vibration in your "field" or vibrational escrow, will release that vibration if you no longer want it. Thus, you have "dealt" with your karma, and it is no longer there.

This is important.

If you do not "deal with or confront your karma", then those karmic events will continue to manifest in your life over and over again. You might notice that the same kinds of things happen to you (maybe in slightly different ways) over and over, for years and years. This is unresolved, unfronted, or unacknowledged karma.

The first step however, is to have full awareness that there is no bad or negative karma. It is just karma. Enjoy your life as a game. Karma sets you up with a bunch of situations you have to deal with. Deal with them as you would if you were playing a game. Enjoy the adventure.

With this "attitude" or viewpoint or perspective, you will "overcome" any and all "negative or bad" karma with grace, ease, AND with speed. You will "blow through" your "bad" karma quickly. You will learn the lessons from them, and you will grow. You will gain strength and courage. You will gain awareness and understanding. You will increase your compassion for others. You will become more "one" with the Universe. You will increase your inner peace, joy, and bliss. You will become more content, fulfilled and satisfied. You will be happier. You will actually enjoy going through and dealing with your karma. It will be fun!

With this attitude, viewpoint and perspective towards karma, you will turn your karmic events into wonderful miracles that work in your favor to help you make all your dreams come true and give you whatever material or non material things you seek.

Most importantly, the karma that you experience will not effect your inner state of joy, peace and bliss. You will have inner stability and certainty. You will have inner conviction of knowingness of Truth.

With this attitude, viewpoint and perspective, your inner state or equanimity will be more secure and permanent.

Take a break and come back tomorrow or another day to continue the Lesson.

Welcome back.

Before you continue, go back to the beginning the reread the Lesson, when you get here, you may continue.

Now that you have read the above a second time, tell me out loud any thoughts or cognitions you have now or had as you read or reread the Lessons.

Thank you.

Take a break of at least 15 minutes before you continue.

Welcome back

Now let's get specific about money.

Making or having money will not make you happy. You think it will.

Everyone thinks having money, or the things money can buy, or all one's desires, will make them "happy" or give them a feeling of contentment, or fulfillment.

Everyone thinks that having money and all the things money can buy will make them "satisfied" on the inside and give them that "feeling" of finally "arriving".

Everyone thinks that if they have something they do not have now (money, a car, different job, a better looking and healthier body, a lover, a house etc), then they will have that "missing something" that they have been looking for their entire life.

Everyone thinks that inner peace, joy, bliss, happiness, excitement, ecstasy, or the feeling that you are on "top of the world", will only come by attaining something you do not have now.

Most people are looking for a relationship (love, affection), recognition (status, acknowledgment), health (no sickness and feeling physically good) and/or money (or what money can buy) BECAUSE they think that having what they do not have will give them that inner "feeling" that is so hard to describe and has always been elusive.

The fact is nothing external can give you that "feeling". No attainment of anything physical can give you that missing something. No condition, experience, situation, person, event or circumstance can give you the "feeling" that everyone is ultimately consciously or unconsciously seeking. No amount of money will ever satisfy you.

You will never have contentment if you are infatuated with money, material things, people, or anything in the outer external physical world.

The ultimate feeling of contentment, fulfillment, satisfaction, joy, bliss, happiness, peace, and ecstasy, can only come from within. It only comes from experiencing the inner state of oneness with all that is. It comes from experiencing being "connected". This is why people are addicted to social media. It gives them a sense of being connected. When you take away a person's smart phone and force them to be "unplugged" for even a very short time, people have panic attacks! But we all know, that social media and being connected via the web, does not give us any lasting or stable inner joy and peace. Everyone constantly needs "more likes", more social media "friends", more "hits", more acknowledgement, more messages etc. etc. No one ever gets enough. No one is ever satisfied. Everyone needs "just a little more".

The ultimate feeling everyone is looking for only comes from "knowing", by personal experience, the one SELF that we all, and everything in the Universe shares and is an extension of. This means knowing and fully experiencing the one consciousness that is all things. This is the ultimate feeling of "connectedness" and "oneness" with the entire Universe. It is a feeling beyond description or human comprehension. But it is a feeling that we all had at one point in our "existence". We do "know" what it is. This is why we seek it. We all want to "go home".

But THIS Lesson is about money. THIS Lesson is not about being happy. It is not about any inner state. It is about manifesting money and what money can buy.

You may still think that the inner state comes from acquiring money and the things money can buy. Again, that inner state does not come from acquiring money or what money can buy.

In fact, seeking money exclusively will only lead you to misery and suffering.

In the Christian Bible it says that "one who seeks riches will never be satisfied with riches." So if you are obsessed with making money, you WILL make money, but the money will not satisfy you. This is why one of the richest men of all time, J.D. Rockefeller, while on his death bed, was still working to make more money. He was never satisfied. He was asked how much money did he think he needed to be satisfied. His answer was "Just a little more".

This is why if you think you will be happy when you get "just a little more money", you will be trying to make "just a little more" your entire life, and you will be on your death bed as J.D. was, totally unsatisfied, unfulfilled, and miserable.

The Christian Bible also states "seek FIRST the kingdom of God which is within you, and all these things (material riches) will be added into your life."

If you get the priorities right, (seeking inner joy first), then all the money and material things will come into your life and you will always be satisfied.

These concepts are not exclusive to the Christian Bible. They are Universal. They are stated in slightly different ways in all scriptures and holy books from all religions and philosophies around the world. They have been talked about by saints, Guru's and sages throughout history.

The key to joy and happiness is being happy NOW, no matter what the external conditions. This is a CHOICE you make every moment.

The key to happiness is NOT being miserable now and thinking "when I get that money THEN I will be happy". That is a formula for a miserable sad life of unfulfillment.

Seek the state of joy (kingdom of God) FIRST, THEN go after making money. This will lead to both happiness and material success. Be happy NOW, even if you are poor and sick and nothing is going your way. Even if you are an innocent person and are in prison! Be happy now. Count your blessings every moment. Look for the gold every moment. Have a feeling of appreciation every moment.

But this is your choice. This is your life. You have to deal with YOUR karma. Many of you still have to learn this lesson of seeking first joy, THEN money, from personal experience.

Because many of you must learn the Lesson that money will not give you happiness from your own personal experience, this Lesson could be a dangerous Lesson for some of you!

Some of you right now still think, "I will focus on the getting lots of money first, THEN I will seek happiness, because I WILL be happy WHEN I get the money". If you think you will be HAPPIER when you get money, you are still missing the point. You still think things will be "better" when you have money.

You must be as happy now, as you think you will be when you are in possession of the money. You must feel right now, AS IF you WOULD feel when you have the money. When you actually possess the money, there should not be a change in your inner state. You should be blissfully happy now. Possessing the money should not be able to "raise" your inner state as you are ALREADY feeling as good as you could and no amount of money or anything else could make you feel better. This is the secret to having BOTH inner bliss, fulfillment, contentment, AND attaining money and all the material things you desire.

STOP. REREAD THE ABOVE PARAGRAPH AS MANY TIMES AS YOU WANT AND PONDER IT.

Now tell me out loud your thoughts, feelings, and any cognitions you have now.

Thank you.

So some of you will go on a money making journey, be obsessed with making money and then "just a little more money" and at some point, wake up and realize that money does not give you happiness. :)

Let me repeat these main concepts.

This Lesson will begin to tell you how to make money, get money, have money, attract money, and create money (it will continue on in future Lessons).

This Lesson is about how to manifest physical stuff, such as money, and all the things money can buy.

Again, this Lesson is NOT about being happy. It is not about attaining inner peace, joy or bliss. It is not about attaining fulfillment and contentment. It is not about achieving a state of perfect harmony and equanimity.

You have the foundation now (as you have gone through 22 Lessons of this Course) to handle this Lesson with discernment and discrimination. You will be able to "read between the lines" as you go through this Lesson.

Some of you will temporarily fall into the trap of seeking money first above all things, and being obsessed with "desires and wants". Some of you will become lured into wanting "money" (and the things it buys) with the false idea that attaining it will make you "feel good", in a way that you do not feel now.

Again, the fact is inner joy and the feeling you are seeking can only come from looking within and having the experience of knowing the SELF (the one universal consciousness that is all things). When you have this "experience" or awakening, you attain the feeling that you have been seeking your entire life and your entire existence.

This "feeling" is something that is beyond human comprehension. That is why there is always "something missing" in one's life no matter what they do, no matter what they attain or acquire, and no matter how successful they are.

This "something" (which is a "feeling") cannot be described, yet we are always seeking it.

Again, this "feeling", this "something missing", cannot come from anything external.

It can not come from another person, a pet, a "beautiful view", a physical experience, sex, drugs, food, alcohol, children, or a place.

It can not come from "doing" anything physical. It can not come from "success", or status, or education, or knowledge, or excelling at a sport, or being skillful at something, or fame, or recognition, or achievement, or wealth, or awards, or having a family, or having a big house or fancy car, or acquiring any material thing.

This "feeling", this "something missing", can only come from having the veil lifted that hides the Truth about reality. When this happens, you then see, feel, experience, and know Truth. You become aware of who you really are. You awaken. You come out of your trance. You come out of your dream. You become aware, and fully conscious.

You then experience no separation from anything. You experience being ONE with everything, everywhere, without "time" or space. You then experience the "feeling" that you have been seeking.

You "see" yourself (the Light; the SELF) in all people and all things. You "become" one with everyone you meet and everything in your physical experience.

That "something missing" is then no longer missing. You found it. You have come "home". You now know exactly what you have been "looking for" and you realize that you have been looking for "it", in all the wrong places (the external physical world).

The main points then, about this Lesson, and manifesting money (or the things money can buy) are these:

- You CAN have anything you want in life.
- You CAN manifest money.
- You CAN manifest your physical desires.
- If you want to be happy, be happy now, no matter what the conditions.
- If you are miserable now, and think that acquiring your desires (money) will give you happiness, you will always be miserable (even if you have fleeting moments of joy, they will never be lasting).

Take a break now and come back tomorrow to continue the Lesson.

Welcome back.

Go back to where it says, "Now let's get specific about money", and starting there reread everything. When you get back here, you may continue.

Tell me out loud any thoughts or cognitions you have now or had as you read or reread the above section of the Lesson.

Thank you.

Take a break of at least 10 minutes before you continue.

Welcome back.

Again, this Lesson is about making money, manifesting money, acquiring money, attracting money, and having money. You can replace the word money with "money and all the things money can buy". You get the idea. This Lesson is about attaining physical "stuff".

Before you continue, activate and illuminate the following words (if they are already in your personal dictionary, simply read what you have there about the words).

obsession; confidence; courage; determination; enthusiasm; resolve; objective; prosperity; success; abundance; lack; command; decree; declare; order; frustration; betrayal; curiosity; initiative; action; motivated; commitment; perseverance; focused; imagination; accurate; concentration; organized; planning; transmute; purpose; passion; leadership; faith; decide; results; rejection; criticism; fear; adversity; failure; win; intuition; intention.

Welcome back.

Tell me out loud any thoughts or cognitions you had as you did the above word process.

Thank you.

In a few moments you are going to start a new process. It consists of answering out loud some commands.

After you answer each of the following commands that I give you, if you have a cognition, make sure you tell it to me out loud. Be as brief or go into as much detail as you want. As you do the process, you can stop and take a break at any time as long as you feel good before you take the break. You can even do this set of commands over several days. Make sure you are well rested and are not hungry or tired when you do this process.

As you read these commands, if nothing comes to mind after 2 minutes, then go on to the next command and come back later to the one you skipped. It is ok if after 2 times, you cannot come up with something. However, do try and search your mind, as I can assure you, there is something there for every command. If you "look and search" your mind, you will come up with something to say.

Remember, be as brief or give me as much detail as you like. The more detail however, the better, but do not put pressure on yourself to give lots of details if you are inclined to be brief. Always speak out loud.

Let's begin: Money Process #1

Tell me out loud about a time when you were obsessed with something such as learning something, doing something, getting something done or achieving something (remember, at any time, if you have a cognition, tell it to me out loud).

Thank you.

Tell me about a time when you felt very confident.

Thank you.

Tell me about a time when you felt enthusiastic.

Thank you.

Tell me about a time when you were determined.

Thank you.

Tell me about a time when you felt curious.

Thank you.

Tell me about a time when you felt very good about yourself and you had a "high self image" or "high self esteem".

Thank you.

Tell me about a time when you were passionate about something.

Thank you.

Tell me about a time when you showed leadership skills or when you were a "leader" in some way.

Thank you.

Tell me about a time when you had faith, and things worked out fine.

Thank you.

Tell me about a time when you felt frustrated.

Thank you

Tell me about a time when you felt betrayed.

Thank you.

Tell me about a time when you felt things did not go the way you wanted or did not turn out the way you wanted them to.

Thank you.

Tell me about a time when you denied what your senses were telling you, what others were saying, what all the facts pointed to, and you still held firm to your "belief" without wavering, and it turned out good for you anyway.

Thank you.

Tell me about a time when you made a firm, strong, unbreakable and unchangeable decision to do or not do something that was so strong no person and not anything could or did change your mind or your resolve.

Thank you.

Tell me about a time when you said something, or did something, and at some point in the future, it came back into your life in some way and hurt you or created a negative experience.

Thank you.

Tell me about a time when you said something, or did something, and at some point in the future, it came back into your life in some way that helped you or created a positive experience.

Thank you.

Tell me about a time when you gave a command, decree, declaration or an order and it was followed without question as if you were a king.

Thank you.

Tell me about a time when you failed.

Thank you.

Tell me about a time when you were focused on results and got the results you wanted.

Thank you.

Tell me about a time when you had one or more people working with you, on the same project, as a team or were working closely together, and you were all focused on one specific common goal that you ultimately achieved.

Thank you.

Tell me about a time when you had a sixth sense or gut feeling or intuition about something and you followed it and it worked out fine.

Thank you.

Tell me about a time when you showed self control.

Thank you.

Tell me about time when you showed courage.

Thank you.

Tell me about a time when you did more than you were paid to do or more than you were asked to do.

Thank you.

Tell me about a time when you overcame fear.

Thank you.

Tell me about a time when you overcame criticism.

Thank you.

Tell me about a time when you overcame rejection.

Thank you.

Tell me about a time when you overcame adversity.

Thank you.

Tell me about a time when you felt you "won" something in some way.

Thank you.

Tell me about a time when you put very long hours or "work" into something and you loved doing it, even if it was "hard work" and "crazy long hours".

Thank you.

Tell me about a time when you had a "singleness of purpose" and/or a very specific single and focused definite goal or objective that "consumed you" and you thought about it most of the time and in most of your free time you spent time working on it.

Thank you.

Tell me about a time when you gave yourself a verbal "pep talk" and used positive "self talk" (you talking to yourself) to make something happen or get over something.

Thank you.

Tell me about a time when you showed initiative.

Thank you.

Tell me about a time when you took immediate and decisive action on something and felt good about it.

Thank you.

Tell me about a time when you felt motivated.

Thank you.

Tell me about a time when you showed commitment.

Thank you.

Tell me about a time when you showed perseverance.

Thank you.

Tell me about a time when you were really focused on something.

Thank you.

Tell me about a time when you used your imagination.

Thank you.

Tell me about a time when you were accurate in your thinking.

Thank you.

Tell me about a time when you showed very good concentration or concentrated very well.

Thank you.

Tell me about a time when you were organized.

Thank you.

Tell me about a time when you planned something out and wrote down your plans.

Thank you.

Tell me about a time when you transmuted some energy (maybe sexual energy, or anger, or frustration) into some project.

Thank you.

Tell me about a time when you wrote down some goal or objective or something you wanted.

Thank you.

Tell me about a time when you were "driven" by a purpose.

Thank you.

Tell me about a time when you had a dream or vision or goal that you thought of all the time and it manifested.

Thank you.

Tell me about a time when you were doing something you loved doing (either in a work, recreational, or social setting).

Thank you.

Tell me how you felt doing the above process and any new thoughts or cognitions you have now.

Thank you.

This is the end of Money Process #1.

Take a break and come back tomorrow to continue the Lesson.

Welcome back.

If you want to manifest money or the things money can buy, you need to have a vibration around you that attracts money.

You have to "know" that you "can" make, earn, manifest, create, attract, have and enjoy money. Again, if you want to manifest money or the things money can buy, you need to have a vibration around you that attracts money, and/or the conditions, circumstances, events, and people needed to help create money. This vibration is a vibration of prosperity, abundance, success, and achievement. It is not a vibration of lack. It is not a vibration of fear.

Fear and lack (and any negative emotion) can be used to help you focus on prosperity, abundance, success and achievement, thus help create a powerful vibration of prosperity, abundance, success and achievement. All negative emotions (vibrations) can be used for your advantage by "transmuting" that energy into your desires. I will explain this in detail later.

There are many ways to cultivate and increase the proper vibration needed to manifest money in your life, while at the same time eliminate or reduce any counter "negative " vibrations that repel money from your life. Some people just come into this life with lots of the "needed vibrations", while at the same time have little of the counter productive "negative' vibrations. This is karma. For these people, money just comes to them easily and effortlessly.

If you are reading this, there is good chance you are not super rich. Money may not have come to you thus far, very easily or effortlessly. If this is true for you and your "past", then it may appear that you do not have the "right karma" to have lots of money. But this is not true. Yes, you did not come into this incarnation with a kind of karma that would give you money fast and easy early in life (you were not born into a mega rich family). However, the fact that you ARE reading this, means you DO have the right karma to acquire plenty of money in your life!

Your karma, your "asking", desiring, wishing, and wanting, has produced in your life this Course, and this teaching, at this time! Think of everything that had to happen for you to be reading this right now. It is not by "accident". It is your "good" karma and your current (or recent) point of focus (your current or recent thoughts)! LOL :):):)

Stop for a few minutes and think about that before you continue.

Welcome back.

Tell me out loud how you feel about the fact that you do have the karma to have lots of money if you so choose.

Thank you.

Tell me out loud any other thoughts, feelings or cognitions you have now.

Thank you.

Answer the following questions out loud in as much detail or as briefly as possible. After you answer the question, if you have any other thoughts or any cognitions, tell them to me as well (very important). Give honest answers. There are no right and wrong answers. Confronting the question and verbalizing the answer honestly is the process. This will produce cognitions. That is why after you answer the question, you tell me any cognitions, thoughts or feelings you have.

Let's begin: Money Process #2.

Do you feel worthy of having money?
Why or why not?

Thank you.

Do you feel deserving of having money?
Why or why not?

Thank you.

Do you feel entitled to have money?
Why or why not?

Thank you.

Do you think you CAN have "plenty of money" in this lifetime?
Why or why not?

Thank you.

Do you think having more money than you have now will make you happy or happier than you are now?
Why or why not?

Thank you.

Tell me out loud how you felt doing that process.

Thank you.

This is the end of Money Process #2.

These processes will increase the needed vibrations for attaining money, and decrease the counter productive vibrations.
You may feel this happening already.

These are powerful processes that has been used successfully for thousands of years and passed down by word of mouth in "secret societies". They are used (not necessarily exactly as stated but very similar) by the privileged elite class families around the world including most "royal families". The results of these processes can be immediate and almost miraculous. For some people, the results come a little less dramatically, and a little slower. The results may come slowly, but they do come surely. Money will, in time, flow like lava into your life, IF you want it. Lava does not flow quickly in most cases, but the flow of lava never stops and nothing can stand in the way of the flow of lava. Lava flows are unstoppable.

You will begin the next process when I say "Start the Process". Read all the instructions first.

Money Process #3

Imagine for 5 minutes (use a timer) the following (all of these in one 5 minute session):

- Imagine money flowing into your life in such a way that it is steady, and unstoppable, like the flow of lava.
- Imagine having all the money you need and want.
- Imagine that all the things money can buy, that you want, are in your possession.
- Imagine how you will feel as you imagine all of the above.

"Start the Process".

Tell me out loud how you feel right now and any cognitions you had during that 5 minute process: Money Process #3.

Thank you.

There are certain qualities, traits, and habits (both physical action habits and mental thought habits) that are common among people who have lots of money. You might guess what some of them are based on Money Processes 1, 2 and 3 and the words you activated and illuminated!

Doing certain physical things with "proper intention", and thinking in a certain way, can begin to create within you, the vibration needed to attract money, and at the same time, reduce the vibrations that you may be broadcasting now, that repel money. Read that long sentence again a few times before you continue! :)

If you want to make money you need the right vibration permeating and broadcasting from you most of the time (all of the time is not needed, just the majority of the time). You also need this vibration to have a certain amount of intensity and resolve. There must be a "determined" element in this vibration. This is a missing secret ingredient to the success or money manifesting formula: resolve and determination.

There is a way you can know if you have this "correct vibrational mix".

Every time you think of money, making money, possessing money, or possessing the things you want that money can buy, do you feel more than just good, but excited, full of expectancy, and

bubbling on the inside with joy, fulfillment, satisfaction and contentment? Think about this question and when ready, answer out loud.

Thank you.

In other words, do you feel now, when you do not have the money or the things you want that money can buy, AS IF you WILL feel when you do have possession of the money you desire and the things you desire that the money will buy? Think about this question and when ready answer out loud.

Thank you.

The feeling you have NOW is the indicator that tells you if you are broadcasting the prosperity, abundance and success vibration or if you are broadcasting the counter productive vibrations of "fear, lack, or need". One set of vibrations attract money and create money and the other set of vibrations repel money and create lack and "need".

One way you can start to develop and cultivate the right vibrations is by physically DOING the RIGHT things, long enough, consistently, with PROPER INTENTION (thoughts). This means consciously doing certain physical things, and consciously thinking in a certain specific way. It also means saying things in a certain way and using certain specific words.

This is all about controlling your mind. Controlling your mind is controlling your thoughts and your "point of focus". When you do this, you control your "feelings". And thus, you open yourself up to receiving. Another way of saying this, is that you enter into a state of "allowing".

When you control your mind, you control your world.

The above formula helps create the right vibrations, which in turn attracts all the right conditions, people, events, situations and circumstances, for the manifesting of money, into your life. This formula also makes your physical actions, and words, produce the desired results: MONEY and all the things money can buy.

Let's discuss the "right things".

In the early 1900's, a young man named Napoleon Hill, was "commissioned" by the richest man in the world at that time, Andrew Carnegie of US Steel fame. He was given the "mission" to study "success" and put the formula for success in written form so all could learn how to manifest all the money they wanted in life.

For years, through Carnegie's introductions, Hill interviewed, studied, and in some cases lived with, the richest and most successful and powerful people on planet earth at that time. People like Edison, Firestone, and Ford. He then put the "principles of material success and the attainment of money" into written form so others could learn the secrets of success.

Up until this time, the super rich kept these secrets to themselves. They were only passed down through the privileged elite class of families or through "secret societies", private exclusive clubs and private invitation only associations.

In Napoleon Hill's first 2 books "The Law of Success in 16 Lessons", and "Think and Grow Rich", many of the key, most important elements or ingredients for success are listed. Those 2 books give the method that works at making people manifest lots of money, 100% of the time.

The Lessons in this Course are very similar to what you would be exposed to in those books and other "classic" books on success and making money. Success principles are universal.

The processes you will find in THIS Course are special and different than what is available in other places. This Course, and the processes in this Course, "program" you to DO, almost on auto pilot, those "right things" and to "think in the right way".

The Processes in this Course are powerful and create results. They work.

The processes in this Course and the energy permeating this Course, and in particular the "Money Lessons", do not exist elsewhere. They have been "passed down" mostly by word of mouth and by mentor (uncle) to student.

The methods used in this Course at teaching the principles are also unique.

You can read many books and take many courses about making money (as there are many very good books, audios, and courses available) and you WILL get most of the secrets and knowledge about making money (assuming the authors are people who have what you want and have been where you are).

There are a few exceptions. There are a few "secrets" in THIS Course about making money that you will not find anywhere else.

But the key is this. Knowledge is power, but only if it is USED and APPLIED. It can only be USED and APPLIED if it is remembered.

To know and not to do, is not to know.

If you say you "know this already" and you are not "doing it", then you do not "know" it.

If you say you "know this" and do not have these principles at your mental fingertips, then you do not "know" it.

You need to know this well enough to teach it...without notes!

If you take lots of courses on how to make money, and read dozens of great powerful books about how to make money, you may think you have lots of knowledge about making money. But the question is, do you remember what you learned in those books and courses? And if you say YES, then are you applying what you "know"? Are you "doing" what you have been taught?

Most people, if honest, would say no.

This is why JUST reading books, or going to seminars, or taking courses does not work most of the time.

Many people who want to make money become professional students, taking every course, listening to every audio, and reading every book they can, as fast as they can. But they never apply any of it. They never really "learn it".

Most people read a book, or listen to an audio, or take a course, and do not remember anything they read, or heard, or learned. And they certainly do not apply or DO any of the things the books, audios, or courses say to "do".

This is why we do "processes" in this Course. They get you to "do" things. They "program" you for success. They help you to develop the right "habits", and doing them with a certain amount of awareness. They get you to internalize the concepts so they are a part of you and a part of your DNA. They actually modify your DNA vibration.

There are several "issues" with Hill's books and all such books on "how to get rich".

The first issue with the Hill books are that they were written long ago, in a different era. Today, people who read them really do not understand what the books are saying. The language is different. The examples in some cases make no sense to us. There was no TV, internet, cell phones, or jet travel. It was an industrial age, not a technology age. There was no globalism or blending of cultures. Many of the concepts that were true THEN are the exact opposite today.

The second issue is, throughout the books, Hill tells you to do certain things, such as read something every morning and every night. No one does what the books says to do (he gives you a lot of things to "do").

I have talked to thousands of people who read those books (sometimes many times) and not a single person has actually done what the book says to do, except ONE! And THAT one person went from being flat broke, to making millions each year. Him and his wife were worth tens of millions of US dollars before he passed away a few years ago.

The system in Hill's books works, if you work it, but almost no one does.

The book "The Science of Getting Rich" by Wattles is a great book as well. It focuses on mainly the thinking part of the equation of getting rich and possessing lots of money. But the same 2 issues apply with this book.

You can read those books for reference and foundation if you wish. If you like reading and studying a subject in depth, then read those books and other "classic" books on success.

You can even read the books AND do everything they say to do (it is a lot of work and effort, and takes lots of time, but for some, it will be rewarding and fulfilling). Follow your feelings and do what you feel it right.

But you do not need to read the books or do what is said in them if you are not so inclined. You can STILL make all the money you want.

MOST of the wealthy people in the world did NOT read those books or any such books. However, all the wealthy people do in fact instinctively DO what the books say to do. Wealthy people instinctively do the right things long enough consistently with proper intention. It is in the DNA.

Wealthy people do in fact follow the "pattern for success" and the "formula for success" in those books even though they never read them. It is instinctive to them, or they learned it through their family or through "secret societies" or private clubs.

As you learned, karma also plays a key role whether one will be rich or poor. This is one key reason why some people are wealthy who have NOT read those books.

It is also a fact that perhaps 90% of the people who DID read those books never made any money at all in their life. This is not because the books are bad and the system, method, and formula for success does not work. The fact is most people read the books, never do any the exercise the books say to do, and then put the books down, and never apply any of the material that was in the books. Those people never changed their thinking. They kept their "failure habits".

If you want things in your life to change, you have to change things in your life.

The system works if you do. The formula or recipe or pattern for success works 100% of the time, but only if it is followed and applied.

If you are 100% committed to making money, then I would suggest you get Hill's book "The Law of Success" and get "The Prosperity Bible". The Prosperity Bible contains many classic books, all on making money and success. "Think and Grow Rich" is one of those books that is in The Prosperity Bible.

My suggestion is follow all the instructions in this Course and do all the processes in this Course as a first priority.

You can read those books as backup material or you can read those books and do all the processes as if you were taking a college course. Follow your feelings. Do what you feel is right.

As always, read those books with discrimination and discernment. Some of the concepts that were true at the time the books were written, are not true today. In some cases the exact opposite is true.

In the next Lesson of this Course, we are going to discuss the main "right things you should be doing, long enough, consistently with proper intention" that will lead to money coming into your life.

Tell me now out loud how you are feeling, and any thoughts or cognitions you have.

Thank you.

Tell me out loud what you got out of this Lesson.

Thank you.

Before you continue, as briefly or as in as much detail as you like, write in your Lesson notebook what you got out of this Lesson and any cognitions you had from this Lesson.

Welcome back.

Before you start the next Lesson, read this Lesson again several times. You do not have to do the Money Processes. However, if you feel you want to do any or all of those processes, feel free to do them. They are powerful processes and will produce major benefits in your energy field every time you do them.

With the completion of this Lesson, you have now entered a very special world known only by a few. This is a place where all your dreams come true and you feel good most of the time.

Do you know what happened to the man who got everything he wished for...he lived happily ever after!

Some call this Paradise. Most simply know it as "home".

Until the next Lesson, may you never be the same.
Namaste.

KT
